

TRACEABLE

From Seed to Fruit, Safely...

"Traceability" is essential for ensuring food safety and quality requirements. We diligently manage production from seed to fruit, with frequent analyses performed in the field, in our production facilities situated across Turkey, and in accredited laboratories. Our facilities and the fruits grown on our organic farms have internationally recognised certification.

WOMAN LABOUR

Miracles of Mother Nature Reach You from the Hands of Women

We find the attentive labour value performed by women very impressive. With this point of view, we attach particular importance to working with women in our production activities and give priority to women's labour.

SUSTAINABLE

Sustainable Agriculture, Sustainable Future

We respect and appreciate the unique balance of nature that offers us its treasures with all its generosity.

With the awareness that natural resources are not unlimited; We carry out our activities with sustainable agricultural practices for efficient and effective use of resources.

With this perspective, we use sustainable natural resources. We realize completely environmentally friendly production by recycling plant wastes and collected rain water.
