INTRODUCTION

YOUR PARTNER IN FOOD INGREDIENTS

With decades of agrifood expertise, Ekoterra Foods is your dedicated B2B partner in the food industry. Our operations were re-established in Italy in 2022, strategically positioned to offer the highest quality ingredients to the producers around the world.

At Ekoterra Foods, we prioritize innovation and a customer-centric approach in everything we do. Our deep industry knowledge and commitment to quality ensure that we provide the best raw materials to support our customers' success.

We invite you to explore our catalogue and discover how our products and services can meet your needs. Thank you for considering Ekoterra Foods as your trusted partner.

OUR PLEDGE

At Ekoterra Foods, we commit to being your trusted B2B partner in the food industry. We supply the highest quality raw materials, driven by innovation and a customer-centric approach. With decades of expertise, we ensure excellence and support your success in every way.

SOURCING SOLUTIONS

SO SEAMLESS, WE BECOME AN EXTENSION OF YOUR BUSINESS

Together with our producing partners in Italy, Turkey, and Poland, we source, develop, procure, import, export, warehouse, and distribute a wide range of ingredients. Driven by innovation and a customer-centric approach, we ensure excellence and support your success in every way..

CUSTOMER CENTRIC

WE MEASURE OUR SUCCESS ON YOURS Global Distribution: With a robust logistics network, we efficiently distribute raw materials to production facilities across Europe. Tailored Solutions: We go beyond being just a supplier; we are a dedicated raw material partner focused on excellence, improving product quality, and innovation for the benefit of people's health. It's in our own interest to **build long-term mutually beneficial relationships** with our partners and we work just as hard as you do.

INNOVATIVE APPROACH

WE SUPPORT YOU IN THE LATEST TRENDS

Clean Labels & Dietary Focus:

Addressing the demand for transparency, we offer clean labels, gluten-free, vegan, and certified organic ingredients.

Global Distribution:

With a robust logistics network, we efficiently distribute to food and beverage producers across Europe.

Tailored Solutions:

Beyond raw materials, our commitment extends to collaborating closely with food producers, tailoring solutions to meet unique requirements.

Ekoterra Food is more than a supplier;

we are raw material partner, dedicated to excellence enhancing the quality and innovation of food products.

We know the flavour of the week and long-term trends, **offering innovation in sustainability, free-from, packaging and more!**

TOMATO PRODUCTS

OUR RANGE

Our tomato product range caters to a variety of manufacturing needs. Each of these products serve a distinct purpose in food preparation, catering to different requirements for texture, flavour intensity, and culinary application.

The Brix level is a key indicator of sweetness and concentration, guiding the selection process to ensure the right fit for specific manufacturing needs.

Made from Italian-origin tomatoes, non-GMO, fresh, healthy, ripe, and thoroughly washed.

FREEZE-DRIED

With our selection of freeze-dried fruits, our ambition is to empower you to turn dreams come true.

Production process: Freeze-drying transforms fruit by “sublimating” their water content, changing it from a solid to a gas without any liquid stage in between. This way, the fruit keeps all its excellent Hqueaalti tniecsr. eases are carefully controlled during the freeze-drying process to preserve the fruit’s flavours, nutrients and colours, thereby opening up plenty of potential usages for you.

Recommended use: In dry preparations, as inclusions for bars, chocolate bonbon decorations, last- minute dessert decorations and more.

Tomato

Pumpkin

Zucchini

CITRUS PEELS

Citrus peel holds more concentrated fruit flavor than the juice or pulp and does not add to water content in food. This makes dried peel an excellent choice for adding orange, lemon, or lime flavor to baked goods, dressings, beer, desserts, and snacks.

In addition, peel does not contain citric acid and therefore doesn't curdle dairy, where juice and pulp do. This makes dehydrated peel perfect for cheesecake, ice cream, and other dairy-based products.

Recommended use: Bakery, brewery, beverages, snacks, dressings, dairy formulas, culinary creations

Orange Peels Coarse Cut

Fine Cut (Tea Bag Cut), Powder, Whole

Sustainably sourced licorice roots are processed with the right cut size, shape and color for obtaining the best results in formulations.

Also for the formulas requiring sweeter and less earthy taste we offer peeled (decorticated) or scrubbed licorice roots in many different forms and calibers.

Our licorice roots can be used for the extraction of Glycyrrhizic Acid , Mono Ammonium Gycyrrhizinate(MAG), Glabridin.

Recommended use: Tea bags, Bakery, brewery, beverages, confectionary.
